

SAT & ACT Case Study

Location: Homestead, Florida

Number of Schools Participating in Case Study: 1

Programs: Prepworks SAT; Prepworks ACT

Implementation:

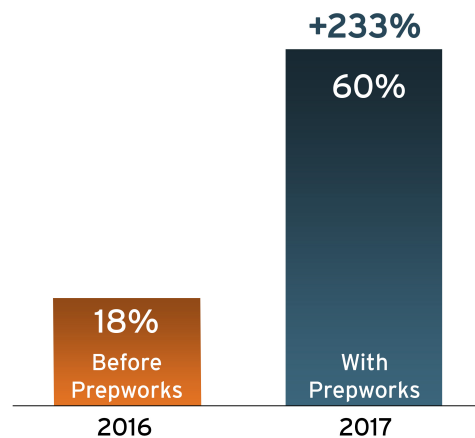

In February 2016, Prepworks designed and implemented an intensive program for 77 seniors, all of whom had previously failed one time or more their state reading assessment required for graduation.

Prepworks was contracted to deliver intensive SAT and ACT programs to be used for state concordant scoring, whereby students are required to earn 430 or higher in SAT EBRW or 19 or higher on ACT English. Prepworks prepared students for the April ACT and May SAT. Students had less than 11 weeks to prepare for official exams.

Results:

Of the 77 participating students, 40 passed, 10 were transferred from the high school, and 27 students did not earn minimum passing scores. 60% of participating students earned minimum or higher passing scores to meet high school graduation requirements. The pass rate represented a record-high success rate for re-testers, with average pass rates the year prior recorded as 18%.

2017
Official SAT/ACT Concordant Scores
High School, Homestead, FL

*All students enrolled had previously failed FCAT one or more times

Prepworks Overview:

With 39 national awards of excellence in education technology, Prepworks is a leader in personalized computer adaptive learning for college and career readiness. Headquartered in Miami, Fla., Prepworks combines assessments, instructional activities, and customized reporting to prepare students for success in middle school and high school, as measured by 21st century standards and high-stakes tests. Prepworks Learning Positioning System® (LPS) technology delivers trillions of prescriptive learning paths, based on each student's individual performance, calculating each student's path in real-time. Prepworks proudly serves teachers and students in private, charter, and public schools and districts across 47 states and 68 countries.
